

Quaranzine

A few tips for this activity.

A zine (*zeen*) is a homemade publication. You can use any kind of paper, any size. You can make several small zines called “registers” to create one big zine, where each register relates to the overall theme of your zine.

There are several ways to bind your zine. You can use a saddle stapler, hole punch and string, rubber bands or make a one-page zine. 😊

1. Think of a theme. Every zine is themed and must have a title on the cover page!
2. Gather your materials. Paper, markers, scissors, glue, magazines, newspaper.
3. Fold your sheet of paper to create your booklet. You can learn how to make a one-page zine [here](#).
4. Cut text and images from magazines and/or newspapers that relate to your theme.
5. Create a collage on every page! You can even include your own text.
6. If necessary...bind your zine using a stapler, string, or rubber bands.
7. Share with friends!
